The Global Immersion in Accounting Field Trip to Australia is a 17-day adventure combining an enriching academic experience with the cultural wonders of Australia. Students will be introduced to international opportunities within the public accounting firms, meet with native Australians as well as Ex-pats to gain a local and corporate view of business in Australia, and interact with their peers in Australia’s version of the Professional Program.

Exploring the Great Barrier Reef, jungle surfing in the Daintree Rainforest, swimming in the Niau Waterfall, spear-fishing with the aborigines and cuddling a koala are just a few of the adventures that provide students with a glimpse of life and culture down under. The itinerary combines the traditional sights of Sydney, Cairns and Melbourne with the benefit of seeing the Aggie Network in action across the world plus the opportunity to contribute back to the people of Australia.
