Mays Business School is pleased to introduce our new Master of Science in Business (MS-BUS). We will welcome our first class of students in Fall 2016. The MS-BUS is an intensive 10-month program that prepares students to enter the workforce with core business knowledge, solid quantitative skills and a basic understanding of best leadership practices. Equipped with this strong business foundation, you will distinguish yourself from your peers in the highly competitive job marketplace.

The program is designed for Texas A&M non-business majors who have had moderate exposure to, and success in, quantitative courses; for example, students who earned a “B” or better in Math 141/142. Students apply to the MS-BUS during their senior year, and the program enables undergraduate students to earn their bachelor’s and master’s degrees in five years. No prior job experience is needed for admission.

CURRICULUM AND KEY FEATURES

The MS-BUS curriculum offers a strong foundation in the basics of business, with courses in finance, accounting, managing people, leadership, entrepreneurship and marketing.

- **Experiential Learning:** The program delivers this core business knowledge through high-impact experiential learning, small-group interaction in class, and team-based projects focused on real-world application.

- **Leadership Development:** Through exposure to contemporary leadership styles and ongoing self-evaluation, students gain deep self-awareness and set goals for enhancing their own leadership skills.

- **Small Class, Selective Peer Group:** The class size will be small so each student engages with professors and classmates in a dynamic learning environment.

- **World-Class Faculty:** Students in the MS-BUS Program will take classes from Mays Business School’s world-class faculty. Our professors are respected experts in their fields, renowned for their cutting-edge research and passion for teaching.

- **Career Preparation:** Through the school’s Graduate Business Career Services office, MS-BUS students will enjoy access to a team of dedicated professionals who are personally involved in your career success.
CLASS PROFILE AND COMPOSITION
For the Fall 2016 class, the MS-BUS Program will admit a selective group of approximately 50 students with an average GMAT of 650. Students will represent a range of undergraduate majors; diverse educational backgrounds and perspectives ensure a high quality classroom experience.

PROGRAM COST AND FINANCIAL AID
Following is a general cost estimate for tuition and fees for the three semesters of the program (36 total credit hours). This estimate does not include books or living expenses.

- In-state cost for tuition and fees: $30,000*

All admitted students are automatically considered for departmental scholarships and assistantships. Exact tuition and fees, along with cost of attendance for financial aid purposes, will be determined by Summer 2015.

*Pending program fee approval by the Texas A&M System Board of Regents

ADMISSIONS INFORMATION
The following are the requirements to seek admission into the MS-BUS Program:

- Online application with application fee
- GMAT score report
- Essay responses
- Three electronic recommendations (at least one that speaks to your quantitative skills)
- Professional résumé

APPLICATION DEADLINES
Applications are accepted for fall admission only. You can submit applications beginning Summer 2015. Decisions will be made on a rolling basis.

Priority consideration: Dec. 1, 2015
Regular deadline: Mar. 15, 2016
